Experience the excitement and magic as nocturnal creatures appear from the bushes and trees. Sit beneath the eucalypts and as daylight fades see the strongly arboreal ringtail possums emerge above from their dreys seeking their nightly meal. Wait quietly and the brush-tail possums wander past in search of some tasty bush offerings & view the antics of the Tasmanian bettong, the 'ecosystem engineers' of the woodlands and a great colonizer of forests destroyed by fire. Follow your guide on a nocturnal walk through local bushland to explore the many nocturnal wonders of Tasmania's native forest with brush-tail possums peering down from high in the trees and hear the bumps of the night as the Bennett's wallabies & pademelons go about their business.
