

Tasmanian Birding Tour

Day Tour

A day of birdwatching in northeast Tasmania

The Experience - 7-8 hours

Departing Scottsdale, explore a fantastic array of habitats to discover a diverse range of bird species in northeast Tasmania. Choose from the coastal regions of Mt William National Park and Bridport Wildflower Reserve or the varied forest and farmland habitats in the heart of north east Tasmania near Scottsdale.

Option - Mt William & Bridport Coastal Reserves

Birds are abundant in Mt William NP with honey eaters, wrens, robins, finches, and pardalotes found in the Park. It is also home to yellow tailed cockatoos, harriers, white bellied sea eagles and wedge-tail eagles. Like Mt William, the Bridport Wildflower Reserve and surrounding areas are also known to be home to over 100 bird species including endemics, green rosella, yellow wattlebird, and yellow throated honeyeaters.

Forests and Wetlands

The Scottsdale region offers a range of bird habitats - great diversity in proximity. We explore waterways, tall forests with undergrowth, open native eucalypt forests, plantations, farmlands and rolling hills. These areas are home to wrens, honeyeaters, robins, whistlers, parrots, thornbills, raptors, waterfowl, waders, fantails and many more. Eleven of Tasmania's twelve endemic species are known to habitat northeast Tasmania.

Duration: 7-8 hours (minimum 2 person price)
Departing: 9.00 am - Scottsdale
Inclusions: Parks pass
Lunch: Picnic lunch - please advise dietary restrictions
